SUMMARY

Right now my biggest goal is to work on IT field. I have studied in Nõo Reaalgümnaasium, where I liked studying mathematics, informatics and other subjects, which included logical thinking.

I have been programming mostly by myself. I have written programs to gaming servers, but I also have experience with databases (MySQL), webdesign (HTML, CSS) and PHP. For a brief time I studied IT in Tartu Ülikool, but for several reasons my studies remained unfinished.

Recently I studied pedagogy and leadership in Kaitseväe Akadeemia as a cadet, but since IT fascinates me more, I took a break from studying.

I am highly motivated to work and learn more about IT.

ADDITIONAL INFO

I like to learn new things about programming daily (React, machine learning).

On my free time, I often go running, to the gym and from time to time I play football.

I think myself as a good communicator, great with problem solving tasks and excellent leadership skills.

I can work very well alone, but also in a group project. Both of these I have been studying in Kaitseväe Akadeemia.
